Referring to Voodoo, many people will think of Helix Jump Hole to once a time of raiding the offline gaming market. And by the end of 2018, this talented developer just added a new game called Ball Blast. The game is currently released for free on both iOS and Android operating systems. If you are looking for an effective entertainment game, this is a great option. Balls and numbersSo away, the ball has always been an endless source of inspiration for Voodoo to create their products. From Dune, Fire Up or Rolly Vortex, the ball is always the focus of the game. This is a very interesting point when only simple balls, developers can create many different titles with great addictive skill. In addition, the numbers featured in this game brings a sense of attraction to those who like to calculate and put logic as a guide to their playing trend. This combination will definitely bring a lot of interesting things for the players. GameplayIn Ball Blast, your mission is to control a mobile cannon to shoot down enemies. The cannon will fire automatically, just drag your finger to the side to move. Your opponent will fall from the sky and bring different numbers. The more you hit the ball, the less the number will fall until they reach 0, the ball will explode and drop gold coins. However, the ball will not stand still for you to shoot. Round spheres with extremely high elasticity when falling to the ground will bounce back and continue to fall. When they're in the air and they fall on you, you lose. That's not all! With each big ball you will find, shooting down will be divided into 2 more balls with a score equal to half the original ball. They will continue to separate the score every time they shot until the size of the ball is not enough to do that. Many challengesThe number of points per sphere depends on its size. When looking at a falling ball, be careful if it splits in two and fall on your head. There is a case in exploding balls, which is small balls, but has several times the number of normal balls. Statistics show that 30% of dead players are caused These little balls. Whether you recognize this or not depends heavily on your sanity and mastery of the game. The more balls you break, the more points you will earn. When you earn a certain number of points, you will unlock the next level. However, the difficulty of the game will increase with the level. The higher the level of play, the more the ball appears and moves faster. Right now, you can discover its limits. Ball blast is created in the style of an endless run game, that is, the balls will keep falling until you make a new mistake. However, this brings an interesting feeling to the game because by losing when it is ongoing, players will have the psychology to play more to set a higher record. Please try your best and invite more friends to join this game. Super large weaponsThe difficulty increases with the level that requires more advanced weapons to overcome them. Weapons with great destructive power, allowing graphics, simple like other Voodoo games. Wide view, the brightest colors are changed through each different level won't make you feel boring. The updated guns are also equipped with beautiful accessories. I think this game can satisfy even the most demanding players.
